CD-US302	Sales of Canadian manufacturing affiliates of U.S. firms, by area of destination, 1962-1965 and 1967-1968 in millions of U.S. dollars.	A-30
CD-US303	Total sales of Canadian manufacturing affiliates of U.S. firms, by type of manufacturing, 1957, 1959, 1961-1965 and 1967-1968, in millions of U.S. dollars.	A-31
CD-US304	Sales within Canada of Canadian manufacturing affiliates of U.S. firms, by type of manufacturing, 1962-1965 and 1967-1968, in millions of U.S. dollars.	A-32
CD-US305	Exports to the U.S. of Canadian manufacturing affiliates of U.S. firms, by type of manufacturing, 1962-1965 and 1967-1968, in millions of U.S. dollars.	A-33
CD-US306	Exports to countries other than the U.S. of Canadian manufacturing affiliates of U.S. firms, by type of manufacturing, 1962-1965 and 1967-1968, in millions of U.S. dollars.	A-34
	<u>Imports</u>	
CD-US401	Imports from the U.S. of Canadian affiliates of U.S. firms by industry, 1962-1964, in millions of U.S. dollars.	A-35
CD-US402	Total imports from the U.S. of Canadian affiliates of U.S. firms, by type of import, 1962-1964, in millions of U.S. dollars.	A-36
CD-US403	Imports from the U.S. of Canadian manufacturing affiliates of U.S. firms, by type of import, 1962-1964, in millions of U.S. dollars.	A-37
CD-US404	Total imports from the U.S. of Canadian manufacturing affiliates by type of manufacturing industry, 1962-1964, in millions of U.S. dollars.	A-38
CD-US405	Imports from the U.S. parents of Canadian manufacturing affiliates, by type of manufacturing industry, 1962-1964, in millions of U.S. dollars.	A-39

ANNEX A

SOURCES AND USES OF FUNDS OF CANADIAN AFFILIATES OF U.S. FIRMS
AS REPORTED BY U.S. SOURCES, 1957-1970

INTRODUCTION

All data in these tables have been taken from the Survey of Current Business which is published by the Office of Business Economics, United States Department of Commerce. A statement of the sources used is appended to each main table.

The statistical tables are numbered in accordance with a general system used in reports of the Foreign Investment Division. Each main table is identified by a reference which consists of the four-letter block, CD-US, and three figures. The letters CD indicate that the table deals with foreign investment in Canada. The letters US indicate that the statistical series are based on sources from the United States.

In the three-figure block, the first digit indicates the subject matter of the table concerned. The first figure is 1 if the table deals with sources and uses of funds; 2 if it deals with expenditures on plant and equipment; 3 if it deals with sales and exports; and 4 if it deals with imports. The second and third figures are numbered sequentially within the subject field.

Some of the main tables are followed by subsidiary tables which are based on them. Each subsidiary table is identified by the reference number of the appropriate main table with a letter added at the end. Thus, the data in Table CD-US202A were obtained through calculations which used the data given in Table CD-US202.

The system of table numbering is compatible with that used in the working paper, "U. S. Direct Investment in Canada as Reported by U. S. Sources, 1946-1967", and in the Amendment List Number 1, which updated it to 1969. In that paper the CD-US group was followed by a one-figure number. When it is revised, the numbers will be given three digits, beginning with 0. Thus, Table CD-US1 will become Table CD-US001.

The tables in the present paper are based on the material available in Ottawa at the end of August 1971. At that time, data were

available up to 1968 for sources and uses of funds, up to 1970 in the case of expenditures on plant and equipment, up to 1968 in the case of sales and exports, and up to 1964 in the case of imports.

All of the series are based on sample surveys. The results are blown up and presented as estimates of the universe with the following exception.

The series on sources and uses of funds covers the years from 1957 to 1965 and the years 1967 and 1968. For the years 1967 and 1968, the statistics given are for the sample only. This is because the 1957 survey, which provided the base for estimating the universe from 1957 to 1965, was not felt to be a valid base for estimating totals for the later years. When the final evaluation of the more recent 1966 survey is made, the Office of Business Economics intends to expand the sample returns. For comparative purposes, this working paper presents two sets of figures for the period from 1963 to 1965. They are estimates of the universe based on the 1957 census, and the totals for the firms included in the sample.

TABLE CD-US101

INDUSTRIAL DISTRIBUTION OF SOURCES (USES) OF INVESTMENT FUNDS OF
U.S. OWNED AFFILIATES IN CANADA, 1957-1965, ESTIMATE OF UNIVERSE

(millions of U.S. dollars)

1/ Adjusted sources and adjusted uses of funds equals total sources or uses less income paid out. The adjusted amounts represent the funds available for internal use by the affiliates.

2/ Funds obtained abroad include funds from Canada as well as funds from all other countries aside from the United States.

3/ This item reflects funds obtained through the sale of fixed assets, changes in certain reserve accounts, valuation adjustments, and residual entries unidentified by reporters.
